

PRANAV RAJESH CHARAKONDALA

Seattle, WA | +1447 902 4780 | prc4@illinois.edu | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Forward deployed engineer and applied AI practitioner, MS Information Management, with 3+ years of experience embedding with healthcare and enterprise customers to understand their workflows firsthand, integrating AI into the systems they already run, and owning production deployments from discovery through evals, guardrails, and support after go-live, with measurable customer outcomes.

PROFESSIONAL EXPERIENCE

CENTER FOR HEALTH INFORMATICS, UIUC | Champaign, IL

Lead AI Engineer | *Multimodal AI & LLM Platform Engineering*

May 2025 – Present

- Embedded with **WHO as the client**, interviewing WHO public health researchers to scope a zero-to-one multimodal health misinformation detection platform, and led its delivery as project lead for 12 student researchers
- Established a **YAML-configured eval framework** measuring precision, recall, F1, and latency across Claude, OpenAI, and Ollama over 40+ experimental runs, then routed each task type to the best-performing model
- Designed human-in-the-loop escalation that **routes low-confidence AI results to a person**, with guardrails stress-tested against prompt injection, jailbreak, and out-of-domain queries, producing zero unsafe outputs
- Fine-tuned Mistral 7B with QLoRA (rank-16 LoRA, 4-bit quantization) on 500 curated health transcripts, raising **classification accuracy from 71% to 84%** and **DEBUNKING F1 from 52% to 78%**

DELOITTE USI | Bangalore, India

Software Engineer | *Financial Services Platform*

Jun 2022 – Jul 2024

- Led **embedded client delivery** for a U.S. Fortune 500 wealth management platform serving 12,000+ financial advisors, taking requirements directly from the client's directors through its migration from legacy systems to Salesforce FSC cloud
- Built **50+ production features and integrations** in Apex, Java, and JavaScript/Node.js across Salesforce FSC, REST APIs, Platform Events, and DB2, troubleshooting and resolving 60+ complex integration defects in production
- Automated resolution of 200+ Salesforce-DB2 data discrepancies by analyzing Splunk logs programmatically, replacing manual review with SQL and Snowflake-based anomaly detection that **cut investigation time by 40%**
- Reviewed code and mentored 2 junior analysts on coding standards, and produced **reusable deployment and rollback playbooks** that kept fast-paced release cycles reliable across UAT and production environments

DRONGO AI (Early-Stage AI Startup) | Bangalore, India

Machine Learning Intern | *Real-Time ML & Medical AI Systems*

Jan 2022 – Jun 2022

- Collaborated with dentists and orthopedic specialists, demoing results and shaping the model around clinical needs, while training UNet and PraNet on dental radiographs for osteoporosis detection to a **10% Dice coefficient improvement**
- Deployed a real-time automatic number plate recognition pipeline using YOLOv4 and PP-OCR, achieving **95% OCR accuracy at 30 FPS** with CUDA-based optimization, containerized with Docker and deployed to production on AWS EC2

PROJECT EXPERIENCE

ReconAI – Production Agentic AI System for Salesforce FSC Integration Diagnosis

Mar 2026 – Apr 2026

- Architected a 4-agent LangGraph system that mines logs across **6 systems of record** to diagnose integration failures, with a proposer-critic-judge loop, retries, self-correction, and dual RAG, reaching 70% root cause accuracy at \$0.006 per incident
- Owned the platform from first commit to production on a Python FastAPI backend, React 18, TypeScript, Supabase, and SSE streaming, delivering **automated RCA in under 15 seconds** instead of 3-hour manual investigations, live at recon-ai-iota.vercel.app

Swagath Central – Production Operations Platform for Multi-Location Business (Freelance)

Jun 2026 – Jul 2026

- Scoped a two-theatre operator's workflows from receipts and stakeholder audio with no spec, then integrated his **POS systems and BookMyShow ticketing** into a Claude Code platform that replaced hand-tallied ticket, snack, and stock counts
- Partnered with the non-technical owner to demo, deploy, and refine the platform around how he used it, reconciling POS and ticketing revenue for first-time visibility that caught **about ₹50,000 in revenue and wastage** he had never seen

TECHNICAL SKILLS

Programming & Languages: Python (Advanced); TypeScript; JavaScript/Node.js; Java; Apex; SQL; RESTful APIs; Distributed Systems

AI & Agentic Systems: LLMs & Gen AI; Agentic AI; Multi-Agent Systems; LangGraph; LangChain; RAG; FAISS; pgvector; Claude & OpenAI

APIs: Claude Code; Prompt Engineering; Fine-Tuning; QLoRA; Eval Pipelines; Observability; Human-in-the-Loop; Adversarial Testing

Backend & Infrastructure: FastAPI; Docker; Kubernetes; AWS; PostgreSQL; Redis; Celery; CI/CD (GitHub Actions); Git; Snowflake; Splunk

Frontend & Full-Stack: React; Next.js; TypeScript; Tailwind CSS; SSE Streaming; REST API Design

EDUCATION

University of Illinois Urbana – Champaign, Champaign, Illinois

Aug 2024 – May 2026

Master of Science Information Management, **GPA 3.86/4.00**

PES University, Bangalore, India

Aug 2018 – May 2022

Bachelor of Technology Electronics and Communications Engineering, **GPA 7.72/10.00**
